Accu-PLUS by TRS-RenTelco. Your best source for quality, pre-owned electronics equipment.

Accu-PLUS pre-owned equipment

16-point Certification Process

All instruments are processed through our accredited calibration lab in accordance with our 16-point Accu-PLUS certification process:

1. Instrument panels and frames are checked for scratches, stains, and cracks, and are resurfaced or replaced.
2. All switches, keys, & knobs are verified in good working order.
3. All displays, LED's, & lights are verified in good working order.
4. All feet and foot stands confirmed present and functional.
5. Calibration tamper-proof seal verified present where applicable.
6. All connectors are inspected for center pin condition and in good working order.
7. Firmware revision validated and annotated.
8. A virus scan is performed on all Window based products.
9. Hardware and software options physically verified present and matched to the equipment request.
10. Fans are verified in good working order, filters present and clean.
11. Unit power cycled and operation verified.
12. Input voltage and fuse confirmed for shipping destination.
13. Standard accessories confirmed present and in good working condition.
14. Current calibration data is verified present & accurate if applicable.
15. Accessories are properly packaged and packed.
16. Instruments are packed with Preset Molded Foam or Instapak in heavy-duty shipping containers.
